

## NON-FIRE RATED DOOR SYSTEMS

# Model PF3000

## Vertical Coiling Perforated Security Door

PF3000 security doors are custom designed to accommodate any opening size. These doors are available in prime painted galvanized steel, aluminum, stainless steel or can be powder coat finished to any color requirement. These security doors require less headroom and side room than product alternatives such as swinging or sliding type doors. They also offer more security and are highly durable and easy to repair and maintain.

This technology is the subject of US Patent No. 8,453,707.

# PF3000

## NON-FIRE RATED DOOR SYSTEMS

# Service & Security Doors

McKEON offers a wide selection of non-fire rated custom service doors. These assemblies can be manufactured in literally any size or for any function including insulated and sound rated, with either solid or perforated slats. All of these slat configurations are available in 16, 18, 20 or 22 gauge. Finishes include McKEON galvanized standard sterling gray, custom powder coat of color as selected, stainless steel No. 4 polish or No. 8 mirror finish, anodized or powder-coat aluminum. Service doors can be oriented to any custom-fit scenario – vertical coiling, side acting, side coiling or horizontal coiling.
