

Tornado. Security. Fire. We Have a Solution!

Achieve an open and creative K-12 environment
without sacrificing fire & life safety.

STORM

Design multi-purpose spaces with large, unobstructed windows and light wells that qualify as compliant safe rooms and storm shelters.

SECURITY

Security grilles provide a more aesthetically pleasing solution to securing openings than conventional accordion folding or sliding gates.

FIRE

Fire door assemblies, with or without egress, are frequently used in area separations, occupancy separations and corridor separations.
