

SMOKE RATED CURTAIN SYSTEMS

SmokeFighter® Model D500S

Vertical Acting Perimeter Barrier

McKEON has added an advanced technology to its tested and proven SmokeFighter Series ... vertical acting smoke protective curtains that form floor-to-ceiling enclosures without mullions or corner posts. Its corner profile is unmatched in the industry!

This UL1784 labeled smoke curtain technology creates its own corners and jambs, vertically acting without any cumbersome features. The system installs with ease, operates smoothly and simply, and conceals beautifully in the finished ceiling.

The D500S can reduce the volume of smoke in an atrium, protect a corridor, or mitigate smoke migration. Best of all, the technology provides required smoke separation without impact to the desired spacious appearance in any design.

Product Features

Ratings

Smoke & Draft labeled UL 1784

Code Compliance

CCRR-0455

Operation

Auto-Set® automatic resetting

Fail-Safe Design - automatic self-closing mechanism does not require power operation to self-close

Size

Widths up to 300' & heights up to 24'

Finishes (metal components only)

McKEON Sterling Gray

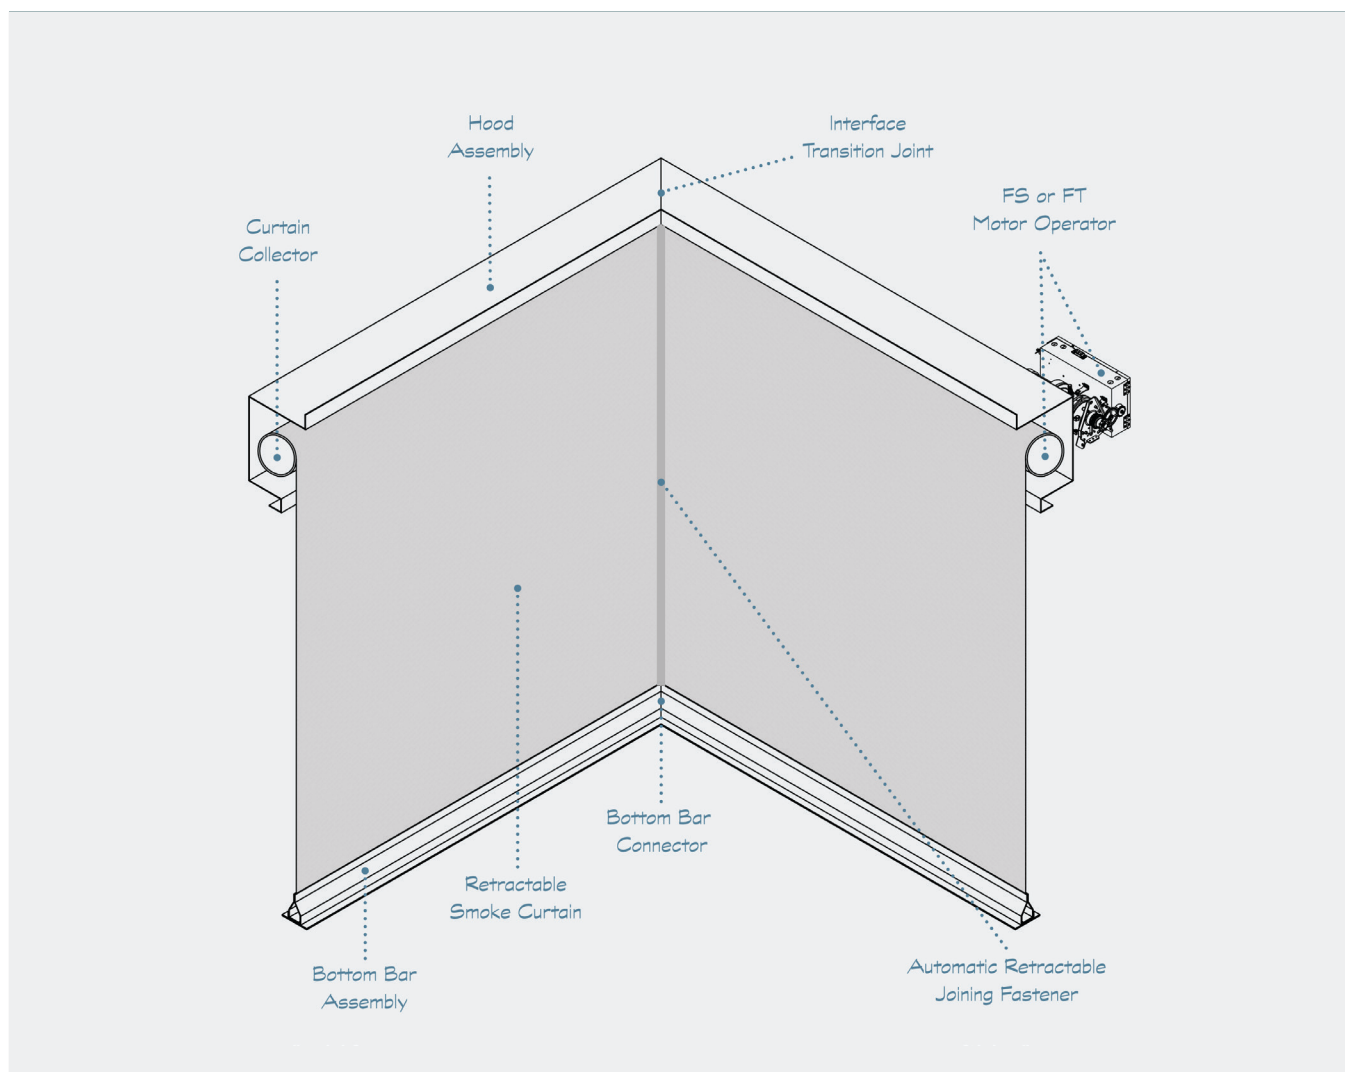

Powder Coat of any color as selected

Stainless Steel – No. 4 Polish or No. 8 Mirror

This technology has patents pending.
