

VERTICAL ACTING FIRE DOOR SYSTEMS

FireFighter® Model D400

Curtain Fire Shutters

The Model D400 is a one-of-a-kind curtain fire shutter that has been tested and labeled to UL 10B for 90 minutes with hose stream and UL 1784 smoke & draft. Unparalleled in the market, it is designed to protect openings in any wall rated up to 2 hours – including Fire Walls and Fire Barrier Walls!

A simple but unique configuration of textile layers permanently joined together as one unit and stored on a barrel in the head box. When deployed, the D400 rolls down as if it were a rolling steel door! A substantial opening protective ready to withstand heat, fire, smoke, and the ultimate integrity test – the hose stream.

Product Features

Ratings

90-minute rated UL 10B with hose stream*
UL 1784 tested & listed without an artificial bottom seal

Code Compliance

CCRR-1086

Operation

Auto-Set® automatic resetting
Fail-Safe Design - automatic self-closing mechanism does not require power operation to self-close

Size

Widths to 80' and heights to 48'; for larger sizes and custom configurations consult the factory

Finishes (metal components)

McKEON Sterling Gray

Powder Coat of any color as selected

Stainless Steel – No. 4 Polish or
No. 8 Mirror

D400

*Listed under the Canadian equivalent CAN/ULC S104
This technology is the subject of US Patent No. 12,048,856 and has additional patents pending.
